

Enviro-Watts is our name for green power—energy generated from renewable, environmentally preferred sources like biomass, sun, wind, water and geothermal springs. When you participate in this voluntary program, we will buy renewable energy from an environmentally preferred source.

The supply of renewable energy is limited. It is priced at a premium. *Enviro-Watts* cost 2 cents per kilowatt hour more than kilowatt-hours purchased under our standard general service rate. If you buy 100-kilowatt hours per month, you pay an additional \$2 per month.

After program administrative costs are recovered, **Bartholomew County REMC** will donate all margins from the sale of *Enviro-Watts* to a local or state environmental project.

As more electricity is sold through the *Enviro-Watts program*, more renewable energy will be purchased.
